<i>Foreword</i>	<i>v</i>
<i>Preface</i>	<i>vii</i>
<i>Acknowledgements</i>	<i>ix</i>

CHAPTER 1 – ENDOMETRIUM	1
--------------------------------	----------

NORMAL HISTOLOGY OF THE ENDOMETRIUM	2
Superficial functional layer	2
Basal layer	2
ENDOMETRIAL CELLS	4
Luminal epithelial cells	4
Glandular epithelial cells	4
ENDOMETRIAL CYCLE	8
MENSTRUAL CYCLE	8
The menstrual phase	8
The proliferative phase (estrogenic or follicular)	10
The secretory phase (luteal or progesterational)	14
MOLECULAR BIOLOGY OF THE ENDOMETRIAL CYCLE	21

CHAPTER 2 – EARLY EMBRYONIC DEVELOPMENT	39
--	-----------

EARLY DEVELOPMENT	40
PREFERTILIZATION EVENTS	45
Sexual reproduction	45
Chromosomes	45
The X chromosome	45
The Y chromosome	46
Meiosis	46
Meiosis I	46
Meiosis II	46
Oogenesis – formation of the female gamete	46
Spermatogenesis – formation of the male gamete	47
FERTILIZATION	47
Phases of fertilization	50
Passage of sperm through corona radiata	50
Penetration of zona pellucida	50
Fusion of plasma membranes of the oocyte and sperm	50
Completion of the 2 nd meiotic division	50
Formation of the male pronucleus	51

CLEAVAGE	51
FORMATION OF THE BLASTOCYST	54

CHAPTER 3 – DECIDUA **57**

DECIDUALIZATION PROCESS	58
Stimuli for decidualization	59
cAMP	59
PGE ₂	59
Relaxin	59
CELLS INVOLVED DURING DECIDUALIZATION	63
Decidualized stromal cells (DSC)	63
Morphology of the DSC	63
Functions of the DSC	65
Molecules secreted by DSC	65
Prolactin	65
Insulin growth factor binding protein-1 (IGFBP-1)	65
Tissue factor (TF) / Plasminogen activator inhibitor (PAI-1)	66
Cytokines	66
Cell surface expression and adhesion molecules	68
Non-resident immune cells	68
Monocytes/macrophages	68
Decidual natural killer cells (dNK)	69

CHAPTER 4 – IMPLANTATION **83**

STAGES OF IMPLANTATION – OVERVIEW	84
ROLE OF THE EMBRYO IN IMPLANTATION	85
Preparation of the embryo for implantation	85
Activation of the embryo and the integrin system	89
Hormone production by the embryo	93
Chorionic gonadotropin	93
ROLE OF THE ENDOMETRIUM IN IMPLANTATION	95
Morphological changes	95
Uterodomes (pinopodes)	95
Hormones and endometrium during implanation	96
Glandular cells and early embryo-maternal dialogue	96
Epithelial glycobiology	97
MUC-1	97
Heparan sulfate (HS) and HS-binding proteins	99
Epithelial adhesion molecules	99
Epithelial junctions	103
Endometrial receptivity and the window of implanation	103
INVASION	104
SUMMARY OF IMPLANATION	105
FACTORS ASSOCIATED WITH IMPLANTATION	106
Overview	106
Cytokines	109
Growth factors	111
Hormones	114

Cell adhesion molecules	115
Extracellular matrix proteins	118
Matrix metalloproteinases and their tissue inhibitors	119

CHAPTER 5 – TROPHOBLAST **137**

INITIAL DIFFERENTIATION OF THE TROPHOBLAST – OVERVIEW	138
EARLY VILLOUS FORMATION	143
Anchoring villi	143
Floating villi	148
MORPHOLOGY OF THE EARLY TROPHOBLASTIC CELLS	148
The cytotrophoblast	148
The syncytiotrophoblast	148
FURTHER DIFFERENTIATION OF THE TROPHOBLAST	149
EXTRAVILLOUS (INVASIVE) PATHWAY	149
Immunophenotypes of evCTB along the invasive pathway	151
Proliferative evCTB	151
Postproliferative evCTB	151
Large polygonal evCTB	152
Small, spindle-shaped evCTB	152
Interstitial CTB	154
Endovascular CTB	154
Multinuclear trophoblastic giant cells	155
VILLOUS (FUSION) PATHWAY	161
MOLECULAR BIOLOGY OF TROPHOBLASTIC DEVELOPMENT	163
Trophoblast differentiation and function – review	163
Factors involved in the differentiation of CTB	163
Extravillous cytotrophoblast (evCTB) function	164
TROPHOBLAST TURNOVER	166
Maintenance, proliferation, and cell cycle regulation in the villous CTB	166
The apoptosis cascade in the villous CTB	169
Proliferation of trophoblast	170
Aging of the trophoblast	171
Trophoblastic shedding	171

CHAPTER 6 – VILLOUS GROWTH **183**

OVERVIEW OF VASCULOGENESIS AND ANGIOGENESIS	184
Vasculogenesis	184
Extraembryonic vasculogenesis	184
Angiogenesis	187
Branching angiogenesis	187
Sprouting angiogenesis	187
Bridging-intussusception angiogenesis	187
Non-branching angiogenesis	190
STAGES OF VASCULAR DEVELOPMENT IN THE PLACENTA	191
Villous vasculogenesis	191
Formation of capillary networks (villous angiogenesis)	197
Formation of stem vessels	200
Regression of peripheral capillary network	200
Non-branching angiogenesis	200

DEVELOPMENTAL MORPHOLOGY OF CHORIONIC VILLI	201
Early development	201
Sprouting	207
Syncytial sprouts	207
Trophoblastic sprouts	207
Villous sprouts	207
Mesenchymal villi	209
Immature intermediate villi	210
Mature intermediate villi	211
Stem villi	212
Terminal villi	215
MOLECULAR BIOLOGY OF PLACENTAL VASCULAR DEVELOPMENT	221

CHAPTER 7 – PLACENTAL FUNCTION

233

FUNCTIONS OF THE PLACENTA	234
TRANSPORT AND METABOLISM	234
Different types of placentas	234
Transport of respiratory gases	240
Oxygen transfer	240
Transport and metabolism of carbohydrates	240
Glucose transfer	240
Transport and metabolism of amino acids	241
Transport and metabolism of lipids	242
Transfer of water, inorganic ions, minerals and vitamins	243
Sodium	243
Other ions	243
Water transfer	244
ENDOCRINE FUNCTIONS OF THE PLACENTA	244
Hypophyseal hormones	245
Human chorionic gonadotropin (hCG)	245
Human chorionic somatomammotropin (hCS)	245
Prolactin (PRL)	246
Other pituitary-like peptides	246
β -endorphin	246
Steroidogenesis in the maternal-fetal-placental unit	246
Progesterone	247
Estrogens	247
Growth hormone	248
Placental peptides similar to hypothalamic factors	248
Human chorionic gonadotropin releasing factor (GnRH)	248
Chorionic thyrotropin releasing hormone (chorionic TRH)	248
Chorionic somatostatin (CS)	249
Chorionic corticotropin releasing hormone (chorionic CRH)	249
Oxytocin	249
Other chorionic cytokines, growth factors, and peptides	249
Leptin	250
Growth factors	250
Relaxin	250
Inhibin and activin	251
Vasoactive peptides	251

Eicosanoids and prostanoids	251
PROTECTIVE FUNCTIONS OF THE PLACENTA	253

GLOSSARY OF DEVELOPMENTAL BIOLOGY	257
